

STATE OF THE ART RADIOLOGY SERVICES PROVIDED BY RAPID RADIOLOGY

LA Imaging has teamed up with Rapid Radiology to provide the best possible service to our facilities. Rapid Radiology's performance requirements far exceed simply interpreting images. All of Rapid Radiology's radiologists are board certified, most are sub-specialty trained, and all are located in the United States. Rapid Radiology uses an extensive QA process for its QA program. This ensures that Rapid Radiology only delivers quality, accurate reports to their customers. To demonstrate their dedication to quality, they provide clear, concise statistical reports, offering their clients an efficient way to monitor their service. Their system was built with an emphasis on quality control. Rapid Radiology's staff and radiologists are monitored on a daily basis to ensure compliance with all policies and procedures, and to ensure quality care is always delivered.

Rapid Radiology's Strengths and Services:

- U.S. based, board certified and state licensed radiologists provide diagnostic reads 24/7/365
- Facility fax numbers are stored in their system so that all reports are faxed automatically to your facility upon completion. Ask us about setting up authorized individuals to receive radiology reports via email and/or text message in addition to the report being faxed to your facility
- Each facility, as well as any patient's physician, may access their facility's images and reports through the Rapid Radiology website via PC or smart phone, anywhere, anytime. LA Imaging will provide you with a facility user name and password to log in.
